Software

Vol. 149, 2002

Author Index

A

Asklund, U. p40

B

Beecham, S. p153
Bendix, L. p40
Bennett, K. p103
Bertolino, A. p93
Biffl, S. p115
Boiten, E.A. p57
Bratthall, L. p137

C

Calero, C. p161
Chen, T.Y. p65
Counsell, S. p86
Coyle, E.A. p179
Crowston, K. p3

D

Derrick, J. p57

G

Gold, N. p103

H

Hagner, O. p131
Hall, T. p153
Halling, M. p115
Heller, G.Z. p18
Hissam, S.A. p47
Host, M. p137

J

Jin, B. p18
Johansson, E. p137

K

Karlstrom, D. p143
Kienzle, J. p77
Kirsopp, C. p123

L

Lombardi, G. p93

M

Maguire, L.P. p179
Marchetti, E. p93
McGinnity, T.M. p179
Mendes, E. p86
Mirandola, R. p93
Mosley, N. p86
Muller, M.M. p131

N

Noren, A. p137

O

Offutt, A.J. p18

P

Peciola, E. p93
Piattini, M. p161
Plakosh, D. p47
Poon, P.-L. p65

R

Rainer, A. p153
Renaud, K. p169
Romanovsky, A. p77
Runeson, P. p143

S

Scacchi, W. p24
Schach, S.R. p18
Scozzi, B. p3
Serrano, M. p161
Shepperd, M. p123

T

Taylor, C.N. p57
Tse, T.H. p65

W

Weinstock, C. p47
Wohlin, C. p143
Wright, D.R. p18

ARTIFICIAL INTELLIGENCE

Design philosophy for self-repair of electronic systems using the UML p179

CIRCUIT THEORY AND DESIGN

Design philosophy for self-repair of electronic systems using the UML p179

COMPUTER APPLICATIONS

Validating metrics for data warehouses p161

DATA HANDLING

Experience with statically-generated proxies for facilitating Java runtime specialisation p169
Framework based on design patterns for providing persistence in object-oriented programming languages p77
Validating metrics for data warehouses p161

DATA SECURITY

Trust and vulnerability in open source software p47

DATABASE MANAGEMENT SYSTEMS

Validating metrics for data warehouses p161

ENGINEERING COMPUTING

Design philosophy for self-repair of electronic systems using the UML p179
Experience of applying statistical control techniques to the function test phase of a large telecommunications system p93

EXPERT SYSTEMS

Design philosophy for self-repair of electronic systems using the UML p179
Making inferences with small numbers of training sets p123

FORMAL LOGIC

Experience with statically-generated proxies for facilitating Java runtime specialisation p169
ODP computational-to-information viewpoint mappings: a translation of CORBA IDL to Z p57

LOGIC DESIGN

Design philosophy for self-repair of electronic systems using the UML p179

PARALLEL PROCESSING

Comparison of Web size measures for predicting Web design and authoring effort p86
ODP computational-to-information viewpoint mappings: a translation of CORBA IDL to Z p57
Open source software projects as virtual organisations: competency rallying for software development p3

PROGRAMMING SUPPORT

Experience of applying statistical control techniques to the function test phase of a large telecommunications system p93
Investigating the influence of software inspection process parameters on inspection meeting performance p115

PROGRAMMING THEORY

Experiment about test-first programming p131

SOFTWARE TECHNIQUES

A study of configuration management in open source software projects p40
Aggregating viewpoints for strategic software process improvement–a method and a case study p143
Benchmarking of processes for managing product platforms: a case study p137
Classification-tree restructuring methodologies: a new perspective p65
Experience of applying statistical control techniques to the function test phase of a large telecommunications system p93
Experience with statically-generated proxies for facilitating Java runtime specialisation p169
Experiment about test-first programming p131
Framework based on design patterns for providing persistence in object-oriented programming languages p77
Hypothesis-based concept assignment in software maintenance p103
Investigating the influence of software inspection process parameters on inspection meeting performance p115
Maintainability of the Linux kernel p18
ODP computational-to-information viewpoint mappings: a translation of CORBA IDL to Z p57
Open source software projects as virtual organisations: competency rallying for software development p3
Requirements problems in twelve software companies: an empirical analysis p153
Understanding the requirements for developing open source software systems p24
Validating metrics for data warehouses p161
